## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The amended claims obviate the art rejection. Further, the prior art is replete with the processes for making 1,3-PDO, however, the instant application has addressed the issue of viscosity reduction that purports to its deleterious effect, as expounded in page 5 lines 11-34 continuing to page 6 lines 1-2 of the specification, that prohibits the efficacy of distillation in a conventional equipment. The applicants further state in lines 16-20 page 6 of the specification that the viscosity of the reactive heavy component stream in the distillation of crude PDO is lowered by a factor of 100 or more when using hydroxide, other than the prior sodium hydroxide.

Thus, the prior art does not manifestly foreshadow the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
